 - (a) a silicone elastomer selected from the group consisting of crosslinked silicone elastomers and silicone elastomer powders, the silicone elastomer being present in an amount effective to deposit a sebum-absorbing level of said crosslinked silicone elastomer on the hair or scalp after the composition has been applied to the hair or scalp;
 - (b) a water dispersible or water soluble ethoxylated ester;
 - (c) at least one surfactant selected from the group consisting of anionic, nonionic, cationic, amphoteric, zwitterionic, and ampholytic surfactants present in an amount effective to provide its intended benefit, and
 - (d) at least about 20 wt% water.
2. (Withdrawn) The composition of claim 1, wherein said silicone elastomer is a dimethicone crosspolymer, an organopolysiloxane, a dimethicone/vinyl dimethicone crosspolymer, a dimethicone copolyol cross polymer, and any combination thereof.
3. (Withdrawn) The composition of claim 2, wherein the ethoxylated ester is present in an amount of from about 0.1 to 20 wt%, based on the total weight of the composition, the ester having an HLB of about 8.5 and above.
